

MEDICINES.

DYSPEPSIA.

AND LIVER COMPLAINT.

BLAKE'S AROMATIC BITTERS.—For five years Dr. Blake's Aromatic Bitters has been a favorite with his neighbors. In a fortunate moment the recipe was discovered, and his own health was restored after long-continued suffering, which he had undergone without the assistance of any medical man. He has availed himself of every opportunity to benefit the afflicted within the circle of his acquaintance, and the results have been most gratifying. His friends, who have been restored to health, have given him the means to make them known to all the afflicted of the family. One of the many persons who have been benefited by the use of this medicine is a man who had been unable to give the medicine circulation, so that the effects of it may be made apparent with its virtues, and thereby confer a blessing on those who are large. Another, who is well known, has established friends with the proprietors, and has sold his entire stock of it in all the large cities; I am sure it would give great satisfaction to all who have taken it, and those who have not yet done so will take it when they learn of its efficacy. It is certainly the best medicine I ever saw, having entirely relieved me of dyspepsia, and produced no side effects. You will be surprised if you know the great change it has made in me. I am perfectly satisfied of its goodness, and when you know how much benefit has been derived from it, why do you not let it more generally known?

This is used by many who reside in different sections of the country, whence orders are daily received in increasing numbers, and the proprietors have induced to extend their use by the establishment of agencies for their sale.

It is a safe and reliable medicine, and will suffer from no side effects, dyspepsia, liver complaints, pains in the breast or side, colic, grippe, &c., &c.

Letting-relieving remarkable cures in cases of fever and ague, palpitation of the heart, bilious, dyspepsia, liver complaints, &c., &c. It is a safe and reliable medicine, and will suffer from no side effects, dyspepsia, liver complaints, pains in the breast or side, colic, grippe, &c., &c.

Enclosed is twenty dollars, which with my highest regards, I send you, for your use, and from the proprietors, copies of some of the many letters of commendation which have been received by them.

Dear Sir:—For over three years I have been afflicted with a severe headache, and from having tried some hundreds of different preparations without the slightest relief, I had begun to consider all medicines as useless until I received a bottle of your Bitters.

I feel that to exist the same two highly is a matter impossible, for with the use of only two bottles I feel myself entirely relieved.

Enclosed is twenty dollars, which with my highest regards, I send you, for your use, and from the proprietors, copies of some of the many letters of commendation which have been received by them.

I consider it a duty which I only owe to you, to speak in praise of your Bitters, a medicine which I think is the best for the liver complaint.

For several years I was suffering with the liver complaint. My health was as bad, and my strength failing so rapidly, that I could give up nothing. I had no time to go to a doctor, and they could do no more for me, and I made up my mind to give up all hope.
